2004-current

U4EA Networks, Inc. <http://www.u4ea.net>

Position: Founder/CEO, Lead Developer

Project Description: advanced social and e-commerce application involving 80 module packages over 10 content management systems. Under gradual spare-time development. MonkeyPanel™ e-Business Control Panel has thousands of task pages.

Skillssets: (XHTML/PHP/Javascript/MySQL/PostgreSQL/CSS/Flash/+more).

this project is awaiting a VC investment to propel the large programming effort.

2001-2004

Dubxpress, Inc. www.dubxpress.com

Position: Founder/CEO/Lead Developer

Designed and Developed a control panel and music service for independent musicians.

Learned much of my knowledge of LAMP stack development through developing this website, though it was determined that it could not properly produce revenue without hundreds of thousands of dollars of CD replication, duplication & printing technology.

Project eventually aborted with the promises of MonkeyBusiness™ Network (above).
